

Hazard Types and Assessment

Borad Questions:

1. Classify hazard according to their origin.
2. Assess the hazard in terms of different parameters.
3. Mention different methods of hazard mapping.

Medium Answer type Questions:

1. Classify Geophysical Hazards.
2. Classify Hydrological Hazards.
3. Classify Biological Hazards.
4. Classify Metrological Hazards.
5. Classify Climatological Hazards.
6. Classify different types of quasi-natural hazard.
7. Classify different types of manmade hazard.
8. Assess hazard in terms of magnitude, intensity and frequency.
9. Assess hazard in terms of triggering factor and spatial occurrences.
10. Assess the hazard in terms of duration and time of onset.
11. Mention the steps of vulnerability mapping.
12. How fixing of scale in hazard mapping is related with different types of hazard?
13. Classify different types of hazard data.
14. Write a short note on risk mapping.
15. How can we make hazard susceptibility map?
